- React and React Native
- HTML CSS Bootstrap
- Java-script
- Java and Spring boot
- Chrome Extension
- MySQL / PostgreSQL
- Express JS / Electron JS

EMPLOYMENT HISTORY

Jr Software Engineer, Silicon Stack Private Ltd Pune, Maharashtra

April 2025 to present

React Native Mobile App:

Contributed to the development of the Air Cloud Go app for Johnson Controls (Bosch), enabling communication between mobile, backend, and firmware to control AC systems.

Assisted in creating proof of concepts (POCs) and migrating native iOS and Android applications to React Native, ensuring performance, scalability, and feature parity.

Jr Web Developer, Invictus Bussiness Solutions Pvt Ltd. Pune, Maharashtra

April 2023 to April 2024

• React Native Mobile App:

Built advanced features like bar-code scanning, OCR, and seamless media uploads to Amazon S3. Followed clean code practices (DRY, scalable architecture) for easy upgrades.

• Ruby on Rails Web Apps:

Implemented strong security (2FA, account locking, session destruction) using Devise after VAPT analysis. Integrated Excel parsing (Creek), data scraping, and partner API fetches with background jobs (Delayed Job, Sidekiq).

• Led RoR Development:

Developed seller tools for Amazon automation—review requests, invoicing, order & stock tracking—via Amazon Seller Partner APIs. Integrated Razorpay for payments, SendGrid for automated emails, and built UI/UX with Soyuz themes & Bootstrap.

• JavaScript Projects:

Experienced with Puppeteer for scraping, Chrome extensions for automation, Electron + React for desktop apps, and Express.js for API development & maintenance.

EDUCATION

Masai School, Online

Full Stack Web Development, IT

Shivaji University, Kolhapur, Maharashtra

B.Tech, Mechanical
